**Subject:** what settlement?

I am more than a little disappointed with the alleged "settlement" with Microsoft. I see daily how their "Josef Goebbels P.R. method" has effected the people of this country. Most of us are too tired, lazy or ignorant to notice what they have been doing all of these years.

We are trying to save money and keep secure by eliminating all traces of Microsoft from our networks and it's working quite well. I wish that Microsoft would be split into several business units so that there might be some true competition in this country.

Thank you for your efforts nonetheless,

Jim
